<ul style="list-style-type: none"><li>• to get rid of scars and stretch marks</li><li>• regenerate the damaged tissues</li><li>• reduce the pigmentation</li><li>• prevent the growth of bacteria</li></ul>	
<b>Ingredients</b>	
<p>Saponified Vegetable Oils (Olive Oil, Camelina Oil, Coconut Oil, Palm Oil, Corn Oil, Castor Oil), Glycerin of Vegetable Origin, Water, Olive Oil, Theobroma Cacao Seed Butter, Chlorophyll paste, Chamomilla Recutita Flower, Tilia cordata Flower, Calendula Officinalis Flower, vitamins E, F, Parfum, Tetrahydroxypropyl Ethylenediamine (HPE-4), Helix Aspersa Snail Secretion Filtrate, Complex Glycoder<sup>™</sup> (Honey (and) Phospholipids (and) Sphingolipids (and) Hyaluronic acid).</p>	
<b>Main components</b>	
<b>HPE-4</b>	

Refers to a new generation of biogenic amines. This component makes it possible to get an anti-age effect, smooth out fine wrinkles, moisten the skin, increase its elasticity, significantly improve the texture.

#### **Glycoderm™**

Liposomal multivalent moisturizing complex containing hyaluronic acid, honey, fosoflipids and sphingolipids. It helps to restore the lipid barrier and supports the natural moisturizing factor of the skin (NMF). Bi-layer of vegetable liposomes in Glycoderm™ contains natural floral honey and hyaluronic acid, obtained biotechnologically.

#### **Filtrate secret grape snail**

It is an antioxidant and possesses powerful restorative properties: it helps to get rid of scars, scars and stretch marks, struggles with flabbiness of skin and cellulite manifestations, promotes regeneration of damaged tissues helps to cope with age spots, significantly improves the skin condition with acne, prevents the growth of bacteria, relieves inflammation and burns, great for care after sunbathing.

#### **Olive, castor, carrot, palm oils**

Used as a nutrient for dry skin. Having a very strong nourishing and soothing effect, they help to cope with such skin problems as dryness, lack of moisturizing, peeling, coarsening, unevenness and loss of elasticity of the skin. They contain a large number of vitamins, significantly prolonging the youthfulness of the skin and responsible for its hydration and elasticity. Therefore, if you regularly use olive oil externally, you can not only provide the skin with sufficient nutrition and hydration, but also avoid its premature aging.

#### **Chamomile flowers**

Have a strong bactericidal, anti-inflammatory and soothing effect, and also stimulates blood circulation. These properties made chamomile an indispensable tool in the treatment of various inflammatory processes.

#### **Lime flowers**

They have analgesic, anti-inflammatory, calming, bactericidal and anti-allergic effects. In addition, it is a strong antihypoxant and an antioxidant.

#### **Calendula flowers**

Stimulate metabolism in skin cells, prevent the formation of free radicals, protect cells from premature destruction, have a bactericidal, disinfectant and wound-healing effect. Being a natural UV filter, protect the skin from sunburn and promote skin regeneration.

#### **Cacao oil**

The curative properties of that plant product are due to its rich composition. It includes vitamins and trace elements, besides, the oil is rich in fatty acids, which serve as a natural antioxidant. It can help with skin dryness problems, due to the presence of vitamin A, stearic, lauric, palmitic and other acids in the composition. The oil has high anti-allergic and regenerating properties.

### **Composition of chlorophyll paste**

It is rich and contains micro- and macro elements, vitamins (E, D), chlorophyll, carotene, volatile and waxy substances, stearins and other biologically active substances and can be called a phytoncidal multivitamin preparation. Chlorophyll paste stimulates biologically active processes, has a stimulating, deodorizing properties. Has a healing wound healing effect.

#### **Vitamin E**

One of the most valuable cosmetic ingredients, an active antioxidant. Protects the lipids of the cuticle and collagen fibers from oxidation and destruction, thus preserving the elasticity of the skin. Protects against premature aging, which is caused by exposure to harmful environmental factors. Has a moisturizing effect and gives elasticity to the epidermis.

#### **Vitamin F**

Due to its anti-inflammatory effect, heals wounds and ulcers, stimulates regeneration and metabolism. Therefore, it is also called a vitamin of beauty, like biotin - vitamin N.

#### **Form release:**

100 g
