

LIPS LIFT SERUM

	<div><div>❖ Cosmetics Revilab</div><div>❖ Lips lift serum</div></div> <div>Vendor code: 60702</div> <div>BUY LIPS LIFT SERUM</div>
Description	
<p>Serum lip takes care of the red edging of the lips and the skin around the mouth. With its innovative peptide Maxi-Lip™, which stimulates the synthesis of collagen and glycosaminoglycan increases lip volume, moisturized skin, reduces peeling, prevents and smoothes "purse-string wrinkles." Lanablue® protects cell membranes and epidermal lipids from oxidation. Evening primrose oil moisturizes and nourishes the skin, protects it from oxidative stress. Pomegranate seed extract has a pronounced anti-aging and antioxidant effect, improves skin tone, stimulates regeneration and micro-circulation in the cells.</p>	
Application method	
<p>To clean skin locally on the red edging of the lips and the skin around the mouth, apply a few drops of serum and spread evenly clapping movements until completely absorbed. Depending on the age of use serum 1-2 times a day. For maximum effect, use a serum regularly for at least 28-30 days 3-4 times a year.</p> <p>Storage conditions: store at room temperature, protected from light. After opening the bottle stored in the refrigerator.</p>	
Ingredients	
<p>Water, evening primrose oil, isodecyl neopentanoate, octyldodecanol (and) octyldodecyl xyloside (and) PEG-30 dipolyhydroxystearate, divinyl dimethicone/dimethicone copolymer (and) C12-13 pareth-23 (and) C12-13 pareth-3, sorbitol (and) alga extract (Lanablue®), ethylhexyl palmitate (and) tribehenin (and) sorbitan isostearate (and) palmitoyl oligopeptide (Maxi-Lip™), pomegranate seed extract, sodium acrylates copolymer (and) lecithin, methylchloroisothiazolinone, methylisothiazolinone, perfume.</p>	
Main components	
Peptide Maxi-Lip™	

The peptide Maxi-Lip™ has biomimetic activity, stimulates the synthesis of collagen and glikoaminoglikanov. The result is an increase in the volume of the lips moisturized skin, reduces peeling, prevents the emergence of "purse-string wrinkles" and comes smoothing existing ones.

Lanablue™

The extract of blue-green algae - Lanablue™, has a high antioxidant activity, protects the components of the dermal matrix by destruction of the epidermis lipids - oxidation, increases the resistance of the skin aggressive environmental influences. Lanablue™ composed of whey helps activate the synthesis of collagen and elastin, so skin becomes smooth and elastic.

The rejuvenating effect Lanablue™ is associated with the effect on the genetically programmed process of differentiation of skin cells, that is, the impact is carried out on the essence of the aging process, and this is due to the effectiveness of this component. Lanablue™ is recognized as the only substance with proven retinopodoidopodobnym effect. Retinoids are widely used in cosmetics, affect the expression of genes to improve skin: reduce roughness, surface wrinkles and pigmentation. Lanablue® is a natural alternative retinoids but without their characteristic side effects.

The extract of blue-green algae is extremely rich in proteins - their content is up to 70% of the total chemical composition. It contains amino acids such as lysine and proline necessary for collagen synthesis, methionine and cysteine, to help in synthesis of large amounts of connective tissue proteins and serine, which is part of the cell membranes. The extract contains vitamins and minerals - the most important components to preserve youth, health, regenerative processes.

Evening primrose oil

Essential fatty acids, evening primrose oil reduced the structure of the epidermis. Evening primrose oil moisturizes, softens and nourishes the skin, protects it from oxidative stress, helps to relieve irritation, smooth out wrinkles. Effectively used not only in cosmetic formulations, but also in the treatment of skin diseases. Especially recommended for anti-age makeup, makeup for special areas (around the eyes, mouth). Evening primrose oil helps restore damaged skin, has regenerating and rejuvenating properties.

CO2 - pomegranate seed extract

CO2 - pomegranate seed extract obtained using supercritical fluid extraction technology. It is this technology allows you to extract the full spectrum of biologically active substances in the plant. Moreover, when applied retains a higher activity and concentration of each component, ten times superior to conventional extract parameters.

CO2-extracts have a natural flavor and do not require a preservative since themselves possess bactericidal activity. CO2 pomegranate seed extract contains phytoestrogens, essential fatty acids, tocopherols, biologically active substances, which have a pronounced anti-aging effect; stimulates the regeneration mechanisms, activates microcirculation and cellular enzymes work. CO2 pomegranate seed extract prevents trans-epidermal moisture loss, wrinkles, improves skin elasticity, has a strong anti-aging and anti-oxidant actions.

Form release:

15 ml
Production
Scientific and Production Center of Revitalization and Health St. Petersburg University of Bioregulation and Gerontology
