

ULTRA-MOISTURIZING SERUM

	<ul style="list-style-type: none">❖ Cosmetics Revilab❖ Ultra-moisturizing serum
Vendor code: 60704	<p><u>BUY ULTRA-MOISTURIZING SERUM</u></p>
Description	
<p>Ultra-moisturizing serum for the face, neck and decollete</p> <p>Syn®Hycan, Revidrate™, Moist 24™ - effectively restore moisture retaining structure of the epidermis and dermis, prevent moisture loss. Evening primrose oil moisturizes and nourishes the skin, protects it from oxidative stress. Pomegranate seed extract has a pronounced anti-aging and antioxidant effect, improves skin tone, stimulates regeneration and microcirculation in the cells. Aloe Vera extract has moisturizing and anti-inflammatory effect, improves micro-circulation, skin turgor, stimulates regeneration and metabolism.</p>	
Application method	
<p>To clean skin, apply a few drops of serum and spread evenly on the face, neck and decollete by massaging gently pat. After completely absorbed, apply cream of series reviline depending on the time of day. Depending on the age of use serum 1-2 times a day. For maximum effect, use a serum regularly for at least 28-30 days 3-4 times a year.</p>	
Ingredients	
<p>Water, caprylyl methicone (and) PEG-12 dimethicone/PPG-20 crosspolymer, cyclomethicone, evening primrose oil, isodecyl neo-pentanoate, ethylhexyl palmitate (and) sorbitan oleate (and) sorbitan laurate (and) myristyl malate phosphonic acid (Revidrat™), Imperata Cylindrica root extract (and) glycerin (and) PEG-8 (and) carbomer (Moist 24™), tetradecyl aminobutyroylvalylaminobutyric urea trifluoroacetate (and) magnesium chloride (Syn®-Hycan), Aloe Vera extract, pomegranate seed extract, sodium acrylates copolymer (and) lecithin, deceth-7 (and) PEG-40 hydrogenated castor oil (and) PPG-26 (and) buteth-26, methyl- chlorisothiazolinone, methylisothiazolinone, perfume.</p>	
Main components	

Syn® Hycan

Syn® Hycan - it is a safe alternative to injections of hyaluronic acid. Syn® Hycan rejuvenating complex peptide that stimulates the synthesis of its own hyaluronic acid and regenerating the intercellular space. The water coming out of the blood vessels in the dermis, directly binds to molecules intercellular substances to form a gel. Thus, the dermis conserves moisture, not acting as a barrier, but rather like a sponge. Excess water was slowly rise to the surface of the skin and seep into the epidermis. Furthermore, Syn® Hycan lumikana and increase the level of decorin - the elements of the extracellular matrix, which leads to sequencing collagen fibers. Thus, Syn® Hycan™ moisturizes the skin, increases its density, tone and firmness levels, models facial contours.

Revidrate™

Revidrate™ - is an effective moisturizing agent, whose action is directed to the active layer of the epidermis to reinforce the natural moisturizing factor synthesis and maturation of the stratum corneum. Restoration and maintenance of natural water and lipid balance leads to the restoration of a smooth oval face and skin. Opening Revidrate™ has made it possible to use a fundamentally new approach to skin hydration, which is involved in several physiological mechanisms, including stimulation of the activity of enzymes involved in the disengagement of filaggrin, which is obtained as a result of the components of the natural moisturizing factor - filaggrinaza and caspase-14. Revidrate™ is similar in structure to the natural bioactive phospholipid sphingosine 1-phosphate, which simulates the maturation of cells of the stratum corneum. Also, this component activates the synthesis of an essential component of the skin humectant glycerol (glycerin analogue).

Moist-24™

Moist-24™ is a plant complex obtained from a plant Imperata cylindrical. It regulates the osmotic balance of the cells and thereby maintains optimum moisture level for a long time. Imperata cylindrical (Imperata Sylindrica) - a plant that can survive in the desert and saline soils, Asia and Australia. This resilience stems from the fact that the plant is extremely rich in potassium and 3-dimetilsulfopropionatom (DMSP) - a substance that regulates ion exchange. These components allow plant cells to keep the maximum number of water molecules, it avoided the losses associated with climatic and other influences.

Aloe vera

Aloe vera - versatile cosmetic ingredient is ideal for the care of every skin type and any age. It contains over 250 high-level components, including vitamins, including rarely present in plants vitamin B12, enzymes, about twenty amino acids, as well as phosphorus, iron, sodium, manganese, magnesium, copper, chromium, zinc and other minerals, the necessary skin. Such rich multicomponent structure makes it an excellent ingredient in anti-age-cosmetics. Polysaccharides, which is rich in aloe, well moisturize the skin and create on the surface of the protective film that prevents dehydration. Aloe vera is an immunomodulator, has photoprotective effect, improves the metabolism, affects the regeneration of cells, stimulates the production of collagen and elastin, improves skin, has a rejuvenating effect.

Evening primrose oil

Evening primrose oil maintains optimum water and oil balance, normalizes the skin's barrier

function. Through active dampening smooths the skin, smooths wrinkles dehydration. The skin becomes smooth, firm, elastic, becomes light and well-groomed appearance.

Form release:

15 ml
