	<u>BUY UNDER-EYE PETALS</u>
Description	
<p>Innovative cosmetic for delicate skin around the eyes. Thanks to the active ingredients and modern manufacturing techniques it provides instant lifting effect, acting in the deeper layers of the skin.</p>	
Purpose:	
<ul style="list-style-type: none">• stimulate the regeneration of tissues• strengthen the collagen structure of the skin and improve its elasticity• moisturize the delicate skin around the eyes and improve skin immunity• has antioxidant and anti-stress effect	
Application method:	
<p>Clean the skin. Remove wet petal of the blister foil tilting angle and pulling it toward you. Put the petal to dry skin in the area under the eyes, gently flatten it with fingertips, moving toward the temples. Remove after 15-30 minutes without washing detergent residue. Petals can be applied in the afternoon and evening, but not later than 2 hours before bedtime. We advise you to use it 1-2 times a week.</p>	
Ingredients	
<p>Basis: viscose, polyester; Gel: purified water, sorbitol, carrageenan, glucose, glycerin, phenoxyethanol and ethylhexylglycerin seed extract, sweet almond akrilata/S10-30 alkyl acrylate copolymer, triethanolamine, collagen hydrolyzate, xanthan gum, sodium hyaluronate, peptide Complexes A-4, A-6 ; Perfume.</p>	
Main components	

Peptides cartilage (A-4)

Regulate the metabolic processes in the connective tissue stimulates regeneration of fibroblasts and keratinocytes, inhibit destructive changes in the collagen structure of the skin, promote collagen structure and effective skin tightening, activating protein synthesis in skin cells, stimulate the synthesis of normal collagen in fibroblasts, increasing the tolerance of cells to hypoxia.

Thymus peptides (A-6)

Stimulates the regeneration of tissue, tissue-specific protein synthesis, proliferation and metabolic activity of cells, accelerate the renewal of cells of various tissues and stimulates the function of cells of the connective tissue, strengthens the collagen structure of the skin and increase its elasticity; have anti-inflammatory effect, accelerates the healing of wounds; have antioxidant, immunostimulant and anti-stress effect.

Sodium hyaluronate

It stimulates the intercellular hydration of the skin and the formation of collagen fibers, keeping the skin tone. One of its molecule is capable of holding up to 500 water molecules, effectively moisturizing the skin and preventing its age-related changes.

Hydromoiist Plus

Moisturizing complex Hydromoiist Plus based on polysaccharides from seaweed and glucose retains moisture in the deeper layers of the skin for a long time.

Polylift

Seed extract, sweet almond Polylift effect provides instant tightening and smoothing the skin micro-relief.

Collagen

Building a protein of connective tissue responsible for skin elasticity. Gidrozalit collagen fills age-related loss of this protein, restores skin tone, moisturizing it and increasing turgor, smooths wrinkles.

Form release:

4 packs of 2 petals
