Description	
<p>Suprefort is a natural peptide complex extracted from the pancreas of young animals (calves no older than 12 months of age). Such peptides have beneficial effects on the pancreas cells by regulating their metabolism and functions. Clinical studies reveal that this product is very efficient in restoring the health of the pancreas and preventing further disorders.</p> <p>Suprefort is recommended for most people over 50 because about 70% of population tend to develop abnormalities in glucose metabolism and dysfunction of the pancreas. The less insulin is produced the higher the level of glucose in blood, that is why many people are forced to take sugar-lowering drugs. Suprefort prevents type 2 diabetes if taken twice a year for a month (60 caps.).</p> <p>In case of an existing disorder, this product allows to lessen the dosage of sugar-lowering drugs while maintaining a normal glucose level. Everyone familiar with this disease knows the unpleasant feeling when the level of glucose is low and to what consequences it may lead. It is therefore extremely important that the dosage of sugar-lowering drugs is accurate. However, Suprefort regulates the function of the pancreas and if the blood glucose level is high, this product effectively lowers it to the normal range without overpassing it. This feature makes Suprefort an exceptional product.</p> <p>Pancreatic diseases are hard to treat, so it is better to prevent them by taking Suprefort as well as by following an appropriate diet.</p>	
Purpose:	

<ul style="list-style-type: none">• Pancreas problems• Digestion disorders• Chronic pancreatitis• Dysfunction of the pancreas• Dysfunctions of the lipid and carbohydrates metabolism• Type I and II Diabetes
Ingredients
Peptide complex A-1 (peptides of pancrease). Inactive ingredients: microcrystalline cellulose (E460), beetroot sugar, lactose, starch, Tween-80.
Directions
Adults: from 1 to 2 capsules, once or twice a day during food intake. Duration - 1 month.
Form release:
60 capsules of 0.2 g
Production
Scientific and Production Center of Revitalization and Health St. Petersburg University of Bioregulation and Gerontology
