	<u>BUY PEPTIDE COMPLEX 1</u>
Description	
Peptide Complex for arteries and heart. Has natural peptides from vessels and liver.	
Purpose:	
<ul style="list-style-type: none">• Prevention of pre-mature ageing,• Prevention of atherosclerosis, hypertonic illness,• Prevention from heart attacks and strokes,• Rehabilitation for patients after heart attacks and after strokes.	
Ingredients	
Distilled water, peptide complexes A-3, A-7, Glycerin, bio-antioxidant complex "Neovitin®", phenoxyethanol with ethylhexylglycerin, propylene glycol, xanthan gum, PEG-40 hydrogenated castor oil, essential oil of rosemary, metilhorizotiazolinon, methylisothiazolinone.	
Application method	
From 6-8 drops apply on the inner elbow part of the arm, perform massage movements until the substance is completely absorbed. Duration - 3 months. Up to 6 peptide complexes can be used at the same time.	
Main components	
<ul style="list-style-type: none">• The essential oil of rosemary <p>The essential oil of rosemary is a powerful stimulant of the immune activity of the human body, it has beneficial effects on the work of the digestive system, it is able not only to fight inflammation, but also has cholagogue effect. Rosemary essential oil is used for breathing</p>	

problems, it softens and relieves cough. The aroma of rosemary is considered the "flavour of the heart." It regulates the circulatory system and heart muscle, and normalizes blood pressure. Rosemary is known for the ability to lower LDL "bad" cholesterol levels and provide anti-sclerotic effect. The aroma of rosemary can even cope with the pain, acting as a natural analgesic. It is recommended to rub in a few drops of oil on the forehead area, temples and neck to relieve headache pain associated with stressful situations.

- Neovitin

Bio-antioxidant complex Neovitin comes from original technology of the cultivated strains of biotechnological method from the ginseng biomass. The new technology allows achieving the most complete extraction of the complex without losing its antioxidant activity. Bio-antioxidant complex Neovitin is anti-inflammatory and has immune stimulatory effects. Synergistic effect of the active components of the complex leads to the production of antioxidant enzymes in the body and interferon, which inhibit the reaction of peroxide oxidation (destruction) of lipid cell membranes of blood vessels whilst strengthening them, and thereby increasing the resistance of the body. Neovitin controls the formation and leads to the physiological formation of the main instigators of premature aging - free radicals, which are developed of throughout human organism life. It is also the main agent to neutralize free radicals. The complex is stable during its storage period and has a high, penetrating ability through the epidermis, dermis and mucous membrane. It has been proved: Neovitin has anti-inflammatory and regenerative effects, which result in its widest application in anti-aging skin and health care products and oral care. The unique properties of Neovitin have been confirmed by 11 patents and awarded gold medals RANS with the name of II Mechnikov "For a practical contribution of improving the health of the nation" and Paul Ehrlich of the European Commission for Academic awards "for outstanding achievements in the field of social and predictive medicine".
