<p><u>BUY PEPTIDE COMPLEX 9</u></p>	
Description	
<p>Peptide Complex for the male reproductive system. Has natural peptides from vessels, brain tissues and liver.</p>	
Purpose:	
<ul style="list-style-type: none">• Chronic prostatitis,• Benign enlargement of the prostate (BEP),• Infertility,• Erection dysfunction.	
Ingredients	
<p>Distilled water, peptide complexes A-3,A-5,A-7, glycerin, bio-antioxidant complex "Neovitin[®]", phenoxyethanol with ethylhexylglycerin, propylene glycol, xanthan gum, PEG-40 hydrogenated castor oil, essential oil of cinnamon, metilhlorizotiazolinon, methylisothiazolinone.</p>	
Application method	
<p>From 6-8 drops apply on the inner elbow part of the arm, perform massage movements until the substance is completely absorbed. Duration - 3 months. Up to 6 peptide complexes can be used at the same time.</p>	
Main components	
<ul style="list-style-type: none">• The essential oil of cinnamon <p>The oil of cinnamon defined cinnamic aldehyde, eugenol and thymol, furfural, pinene, linalool. Increases metabolism and blood flow. It serves as a means of fainting, dizziness and</p>	

nausea. Good psychotropic drug with anxiety, fear, depression, melancholy, asthenia. Essential oil of men enhances sexual desire and opportunity, due to the fact that stimulates blood circulation in the pelvic organs in men, prevents the emergence of stagnation in the genitals. Also good for sports, it increases their efficiency, helping to warm up faster and easier to tolerate exercise.

- Neovitin

Bio-antioxidant complex Neovitin comes from original technology of the cultivated strains of biotechnological method from the ginseng biomass. The new technology allows achieving the most complete extraction of the complex without losing its antioxidant activity. Bio-antioxidant complex Neovitin is anti-inflammatory and has immune stimulatory effects. Synergistic effect of the active components of the complex leads to the production of antioxidant enzymes in the body and interferon, which inhibit the reaction of peroxide oxidation (destruction) of lipid cell membranes of blood vessels whilst strengthening them, and thereby increasing the resistance of the body. Neovitin controls the formation and leads to the physiological formation of the main instigators of premature aging - free radicals, which are developed of throughout human organism life. It is also the main agent to neutralize free radicals. The complex is stable during its storage period and has a high, penetrating ability through the epidermis, dermis and mucous membrane. It has been proved: Neovitin has anti-inflammatory and regenerative effects, which result in its widest application in anti-aging skin and health care products and oral care. The unique properties of Neovitin have been confirmed by 11 patents and awarded gold medals RANS with the name of II Mechnikov "For a practical contribution of improving the health of the nation" and Paul Ehrlich of the European Commission for Academic awards "for outstanding achievements in the field of social and predictive medicine".
